

To subtract using column method

Steps to Success:

- 1) Write the largest number on top
- 2) Write the numbers with correct place value
- 3) Start with units
- 4) If the top number is smaller, you have to 'borrow' from the next column
- 5) Make sure to change columns you borrow from

Steps to Success:

- 1) Write the largest number on top
- 2) Write the numbers with correct place value
- 3) Start with units
- 4) If the top number is smaller, you have to 'borrow' from the next column
- 5) Make sure to change columns you borrow from

$$476 - 357$$

Write it like this:

$$\begin{array}{r} \text{H} \quad \text{T} \quad \text{U} \\ 4 \quad 7 \quad 6 \\ - 3 \quad 5 \quad 7 \\ \hline \end{array}$$

Steps to Success:

- 1) Write the largest number on top
- 2) Write the numbers with correct place value
- 3) Start with units
- 4) If the top number is smaller, you have to 'borrow' from the next column
- 5) Make sure to change columns you borrow from

$$476 - 357$$

Start with the units,
and take away:

	H	T	U
	4	7	6
-	3	5	7
			9

Steps to Success:

- 1) Write the largest number on top
- 2) Write the numbers with correct place value
- 3) Start with units
- 4) If the top number is smaller, you have to 'borrow' from the next column
- 5) Make sure to change columns you borrow from

$$476 - 357 = 119$$

Now you can finish it:

	H	T	U
	4	7	6
-	3	5	7
	1	1	9

Help your teacher do these:

Steps to Success:

- 1) Write the largest number on top
- 2) Write the numbers with correct place value
- 3) Start with units
- 4) If the top number is smaller, you have to 'borrow' from the next column
- 5) Make sure to change columns you borrow from

$$858 - 446 \quad \text{H} \quad \text{T} \quad \text{U} \quad 485 - 457$$

Steps to Success:

- 1) Write the largest number on top
- 2) Write the numbers with correct place value
- 3) Start with units
- 4) If the top number is smaller, you have to 'borrow' from the next column
- 5) Make sure to change columns you borrow from

You will have to borrow twice for this one:

$$634 - 355$$

Steps to Success:

1) Write the largest number on top

2) Write the numbers with correct place value

3) Start with units

4) If the top number is smaller, you have to 'borrow' from the next column

5) Make sure to change columns you borrow from

$$476 - 357$$

H	T	U
4	7	6
-	3	5
1	1	9

Complete these in your books using column method:

1) $385 - 243$

2) $854 - 632$

3) Decrease 475 by 213

You will need to borrow in these:

4) What is the difference between 851 and 408?

5) How many less is 284 than 482?

6) Decrease 884 by 655

7) How many less than 1084 is 446?

Can you do these challenges:

You will need to borrow twice:

10) $1048 - 589$

8) $343 - 296$

11) How many less than 5900 is 758?

9) $2483 - 1529$
